NONDESTRUCTIVE TESTING SERVICES

FOR THE OIL & GAS PIPELINE INDUSTRY

EST. IN THE USA

Prime NDT Services, Inc. is a US-based, inspection company that was established in 1996 in Schnecksville, Pennsylvania. We are dedicated to performing the highest level of quality work in nondestructive testing (NDT) services across a variety of new construction and asset integrity assessment projects in the oil & gas and industrial industries.

NDT SERVICE OFFERINGS

Prime NDT offers a full spectrum of conventional and advanced NDT services conducted by highly experienced and qualified technicians. Our dedicated pipeline NDT management team and extended fleet of mobile equipment - outfitted with conventional and advanced NDT tools - enables us to provide extensive pipeline NDT expertise and large-scale project capability in more locations than ever before.

Our approach enables highly productive operations, complete project visibility, and high quality results - no matter the scale or time sensitivity of the project.

PIPELINE NDT FOCUSED APPROACH

Providing nondestructive testing services on pipeline construction projects in the oil and gas industry is the backbone of Prime NDT. Our senior management team has over 25 years of experience in North America - with a successful track record providing large-scale, pipeline NDT services for major up- and midstream companies, while also working with a number of the largest pipeline contractors in North America.

DEDICATED MANAGEMENT TEAM

- We leverage a selection of highly qualified NDT technicians with a strong background in pipeline inspections to provide **innovative, tailored solutions for even the most complex projects.**
- Our objective is to provide a seamless project management experience as the single contact source that is responsible for driving **efficient supervision of personnel and technology resources on site and on time.**
- Our project managers ensure that customers receive **complete project visibility** through ongoing communications, documentation, and reports, as well as 24/7 access to their project manager.

CHALLENGING ENVIRONMENTS

- Our extensive experience working in harsh terrains and varying climatic conditions has enabled us to perform with high reliability and efficiency in almost any situation.
- This includes a large fleet of UTV's, modified crawlers to perform on steep inclines, and portable equipment that can be remotely mobilized, as required.

HIGHLY QUALIFIED TECHNICIANS

- We have priority access to the leading NDT training facility in the US. As a result, we employ some of the highest skilled technicians in the industry.
- All of our field personnel are trained to the CP 189 standard and tested in accordance to ASNT-TC-1A.
